Shaping ideas into plastics

SEA KAYAKING

Sea kayaking is a new sport in the Philippines, but with 7,107 islands offering every conceivable variety of

seascape, it is sure to expand quickly. The islands offer thousands of kilometers of superb paddling on crystal-clear water, taking in exotic villages, pristine beaches, coral reefs, and mangrove swamps along the way. The kayak, silent and unobtrusive, is the perfect way to explore these delicate ecosystems without disturbing wildlife or the peace of nature. It is a definite competitive edge for resorts and rest houses.

INCA[®] KAYAK

INCA is the name behind the leader in roto-molded products in the Philippines. It is the pioneer in producing the most popular SIT-ON-TOP kayaks locally. No frills, just hop on and paddle away!

INCA kayaks have two molded in-seats and foot-wells. Its design allows ease in paddling, stability and performance that would guarantee to outlast your fascination.

MATERIALS

INCA kayaks are molded seamless, made of virgin polyethylene resin. This makes the kayaks tough and highly durable.

The resins are also compounded with ultra violet stabilizers to ensure no chipping and fading under tropical conditions.
